## COMPANY BACKGROUND

Ecoworks construction limited is a wholly Zambian owned, managed and registered company with its operation based in Lusaka, Zambia. Eco Works construction was established in January 2012 as Building construction, Road construction engineering design, project management and landscape design company .

# COMPANY POLICIES

**Ecoworks mission is to provide our clients with the current mixture of personnel, equipment and attitude necessary to the project in order to give reliable, quality, efficient, eco-friendly and cost effective service.**

**We aim to establish ourselves as a self reliant and sustaining project developer and contractors through the inclusion of**

**material research, equipment, redevelopment and redefinition of work methodology as tools to propel our foothold in our sector and region. Our primary goal is to target commercial and domestic projects.**

**Ecoworks construction Ltd values its human resource above all and strives to create a work culture that allows technical growth, financial and social growth of our associated employees for the betterment of their community and our environment.**

**As a company, we also pride ourselves in being able to deliver all contractual obligations within the stipulated period to the satisfaction of our clients, without compromise to the quality and standards set.**

**This is achieved through meticulous pre-contract planning that allows flexibility of any eventualities**

# HEALTH & SAFETY POLICIES

Ecoworks construction limited holds health and safety as two of the companies most important responsibilities and functions and is regarded as the essential foundation for successful business and social operations. Health and safety is recognized, implemented and maintained as a legal, humanitarian and economic responsibility expectation.

Ecoworks construction limited management believes that a robust safety approach is indicative of an assertiveness and responsiveness to employees, leading to enhanced productivity and in turn increase bottom line.

# ENVIRONMENTAL MANAGEMENT POLICY

Environmental management is one of our companies many responsibilities and should be acknowledged to be of prime importance. It is therefore imperative to support the environmental programs.

Ecoworks construction's policy is the fulfilment of its legal and statutory responsibilities that represents the minimum level of achievement in respect to environmental control.

Our Core Objectives include:

- To comply with the legal and statutory requirements
- To observe all environment provisions regularly
- To take responsible care of the environment
- To do nothing liable that cause damage of the environment management and employees of Ecoworks Construction.

**We commit ourselves to actively participate in environmental control regulations.**

## **"Cradle to cradle" Remarking how we do things**

*"Reduce, reuse, recycle" urge environmentalists: In other words, do more with less in order to minimize damage. A tree produces thousands of the blossomes in order to create another tree, yet we do not consider its abundance wasteful but safe, beautiful and highly effective. There, "waste equals food" is the first princple that Ecoworks has set forth. Products might be designed so that after their useful life, they provide nourishment for something new.*
